A collection of easy clean vinyls for the healthcare sector

ARTISAN

By Mosaic

Easy clean vinyls with style, Artisan is inspired by traditional crafts - the weaver's Calico, the silversmith's fine Filigree work and the scribe's Shodo.

This collection of petite designs draws on a sophisticated, yet fresh colour palette to create a stylish vinyl upholstery choice for use in hospitals and care homes.

Mosaic by Skopos is an ISO9001 accredited company with over 30 year's specialist experience in the design and manufacture of high performance flame retardant contract fabrics.

The Artisan collection has been specifically developed and laboratory tested to ensure it meets all practical, safety and durability requirements without compromising design.

Mosaic has a sales team dedicated to the healthcare sector who would be happy to provide samples, advice and further information about Artisan or any other of our products and services.

We can also arrange tours of our showroom, manufacturing facility, in-house laboratory and sewing room from which we offer a full make-up service.

For further information please contact our Sales Office.
